

DRF COMPANY PROFILE

www.drf.com.tr

DRF[®]
Design Renovation Factory

DRF is European based full package interior furniture design and production company with 2 locations in Istanbul and Bulgaria serving within EMEA region.

DRF has shown strong growth in recent years thanks to its professional, customized but affordable solutions.

DRF provides an excellent service with the help of its engineering / technical infrastructure in the design, planning and production of MDF LAM type products.

DRF has a high level of experience in the furniture sector, and with the help of this experience, it serves with a team of 15 highly experienced engineers and architects in all kinds of projects and 90 experienced employees in production.

MDF LAM Production Line and Raw Material Storage: 5.000 m²

Solid Coated and polish Production Line: 3.000 m²

Caglayan Showroom: 800 m²

Masko Showroom: 1.200 m²

Production Planning & mock-up studio: 1.600 m²

Architectural Design Office: 130 m²

DRF offers services with a total production and planning area of 11.730 square meters.

DRF has focused on business development especially in international trade and real market for the last 12 years. Working with its clients' architects and designers, they offer a dedicated service and Project development assistance throughout the design, manufacturing and installation process.

DRF has years of experience working with major international brands and multinational projects, with a broad client base.

DRF can provide effective solutions for projects with unrivaled cost due to their sufficient production capacity and skills in modern production facilities. With new and innovative product updates, product lists are increasing in number and variety every year.

DRF has successfully completed many hotel, restaurant, office and housing projects in Saudi Arabia, Mozambique, Ghana, Germany, and Azerbaijan during these 12 years.

DRF is currently working on Frontel Palace & Ramada Continental projects in Jeddah and Musalli Hotel project in Mecca.

MACHINE EQUIPMENT LIST

TWO- LAYER HOT PRESS

UMUR UP Series Presses are used for bonding coating, laminate finished foil products.

- Electric heating plates provide homogeneous heat distribution on the surface of the table thanks to the resistance system developed by UMUR and facilitated maintenance and repair.
- With the newly designed heating system in the screeds heated with hot oil, a very smooth heat distribution and energy saving has been achieved.
- The body has been redesigned and strengthened with a computer-aided calculation system, and flexing at maximum pressure force has been minimized. In this way, a homogeneous pressure distribution is provided on the table.

FIVE AXIS CNC MACHINE

Our machine is an indispensable equipment in all kinds of decoration work with its 5 axis configuration. It can process 5 surfaces of the part.

AES RAPTOR ULTRA 2142

Working area dimensions	2.100 x 3.200mm 83"x126"
Z axis distance	200 mm 7.8"
Working Area	Single Zone
Working Speeds	113m/min(4.453 IPM) Vectoreel Speed
Spindle Motor Power	9 kW 12 HP HSK F63 Air Cooled
Hole Group	14 Dik - 3x2 Horizontal - 1 Saw
Magazine Unit	Movable Magazine Unit 8 Sets Capacity(on Z Axis)
Vacuum Pump	250m ³ /h 8.9HP
Lift and Loading Unit	450 mm / 17.7" - 3.000 kg / 6.61 kg Capacity
Drain Cleaning Unit	1.600 mm / 63" 2.100 mm / 83"
Conveyor Unit	Var
Software	Alphacam Essential 2D or AES WOP
Weight	9.850kg / 21.715lbs

BIESSE TECHNO LINE TYPE DRILLING MACHINE

It is an industrial type multi-hole machine that can drill an average of 4000-5000 pieces per day.

CASE SIZING MACHINE

It performs cutting and drilling operations for 45 ° corner joining applications in wooden door frames and moldings.

CNC DRILLING MACHINE

Vitap POINT, 3-axis flexible line boring machine performs all kinds of drilling operations such as minifix, shelf pin, handle, hinge, screw place, dowel, without the need for adjustment time, under computer control. With the channel saw unit driven by a separate motor on it, it also performs the full or half channel operations required for the rail cover on the panel surface and the backrest.

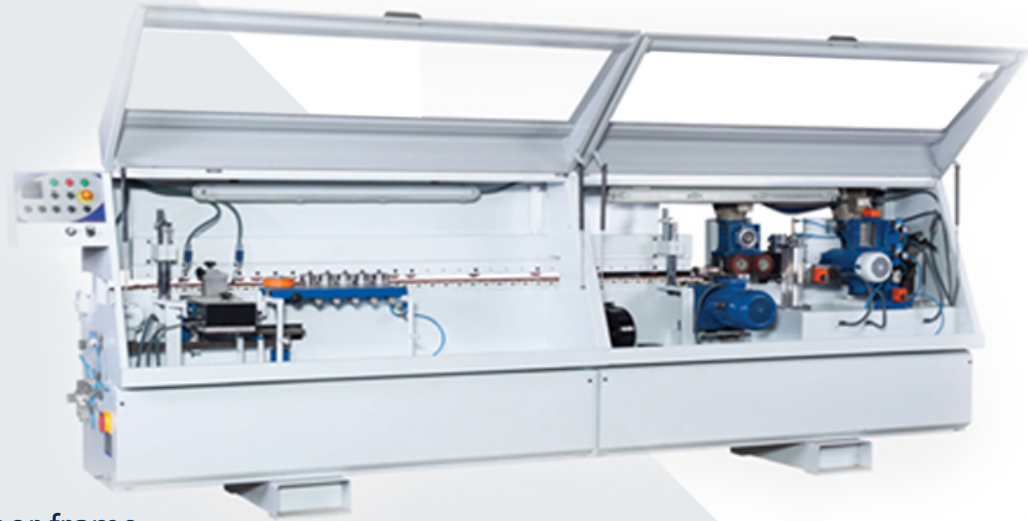

CONTACT SANDING

Top surface of panel surfaces processes (coating, paint) used to prepare is a sanding machine. This broadband sanding machine performs both coarse and fine sanding, which we call combi, by changing the sandpaper. In coarse sanding and smooth surface desired surfaces are made by means of the rubber cylinder at the first entrance, coated surfaces and fine sanding is done by means of the air cushion between the two cylinders. This prevents the bottom of the material from coming off by tolerating the twists that may occur on the coated surface up to 0.5 mm.

DOOR SURFACE MACHINE

Convex molding bonding machine door and door frame used in the production, but unlike others straight as well as curved back or can take different shapes according to the blade used in the production of moldings.

Automatic Part Making

Right side milling

Left side milling

Opening a plaster channel

Chamfering on the jamb lug

Convex milling

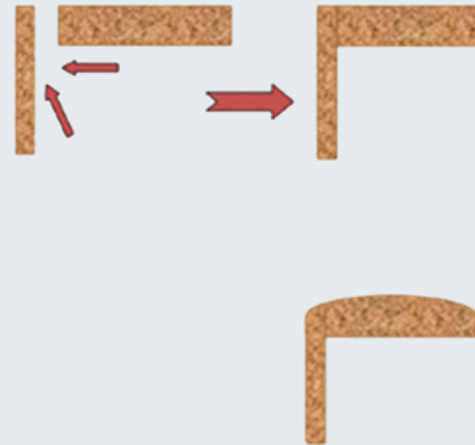

300-500 Pieces per Hour

Part thickness: 8-30 mm

Tape thickness: 3-6 mm

Maximum border width: 65-125 mm

Working speed: 32m / min

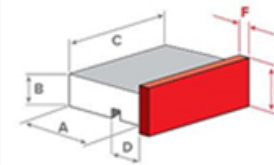

EDGE BANDING MACHINE (with polyurethane boiler)

T-EB 701

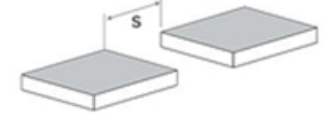

It is a high capacity edge banding machine with belts and pallets.
All the necessary settings for the banding process are made automatically with the industrial computer integrated into the machine.

Working speed: 15-20-25 m / min

- Mono block chassis structure
- Strong structure belt top printing system
- Computerized industrial control panel
- Band thickness adjustment system with servo motor system
- HGS band pass system
- Automatic glue feeding unit
- Automatic pallet and unit lubrication system

A	min. 70 mm
B	min. 10 / max. 50 mm (on frezesiz, Without pre-milling 60 mm)
C	min. 120 mm
D	max. 35 mm
E	min. 14 mm / max. 64 mm
F	min. 0,4 / max. 3 mm
S	600 mm

EDGE BANDING MACHINE

Lace thickness: 0.4 - 3 mm

Max. panel height: 50 mm

Edge thickness: 3 mm

Min. panel length: 150 mm

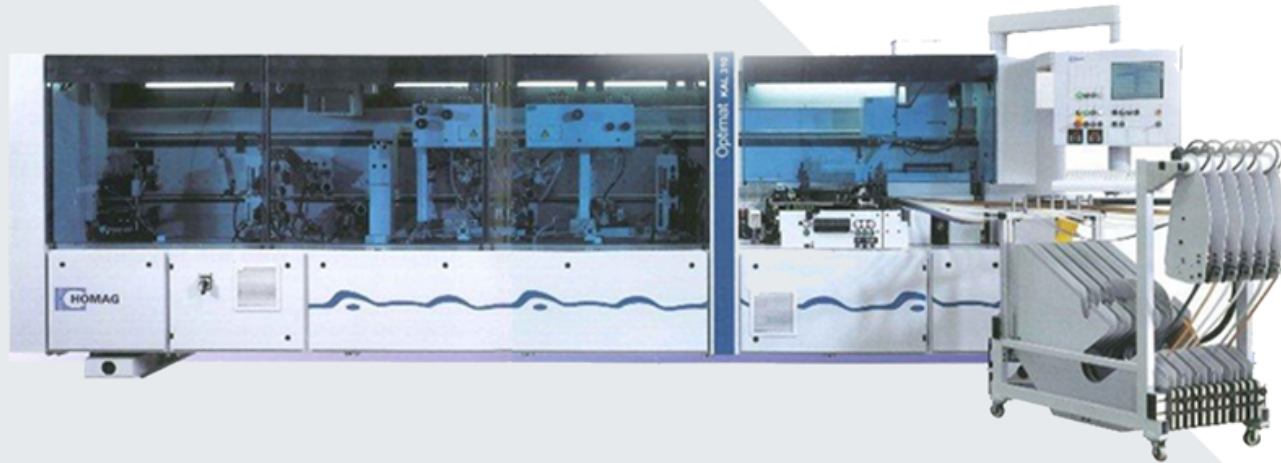

Min. width panel: 70 mm

Delivery speed: 18-22 m / min

Air pressure: 6 bar

HOMAG KAL 310

HOMAG KAL 310

Feeding speed 28 m / min

Pre-milling unit

QA34 gluing unit

Tip straightening unit HL 04/05

Rough smoothing unit

Corner rounding unit FK11

Universal milling unit UF11

Edge scraping unit MN21

FA 11 top / bottom polishing unit
with flat scraper and polishing unit

MACHINE CONTROL

Power Control NC 21

KR BM 1700 AUTOMATIC SPRAY MACHINE

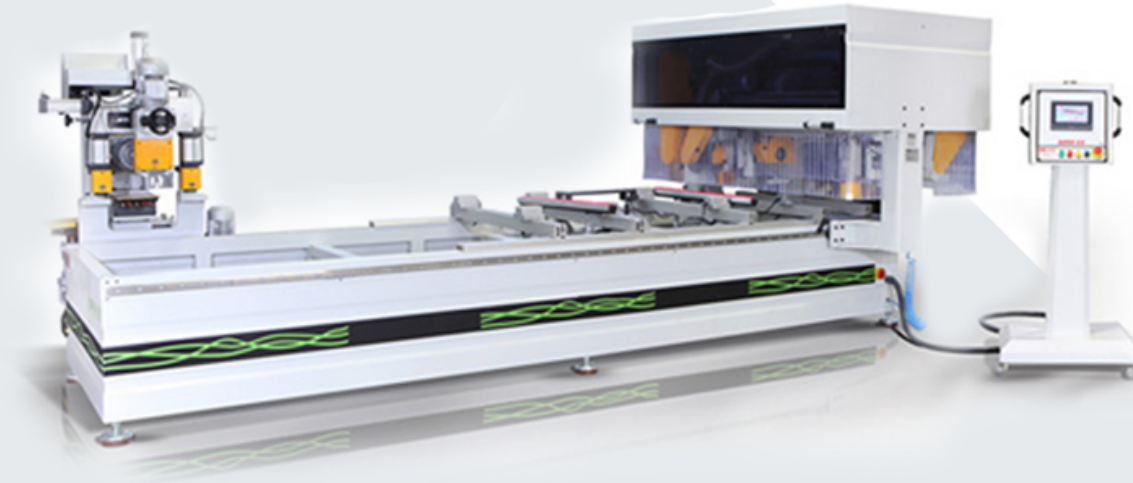

It is a computer-controlled profiling machine that can process parts up to a maximum width of 230 mm and a height of 150 mm, with a processing capacity of 5-30 m per minute.

KR BM 1300 SURFACE GRINDING MACHINE

Surface Sander KR YZM 1300; It is a highly sensitive sanding machine developed to sand the raw and primed surfaces and carvings of doors, covers and modular furniture parts.

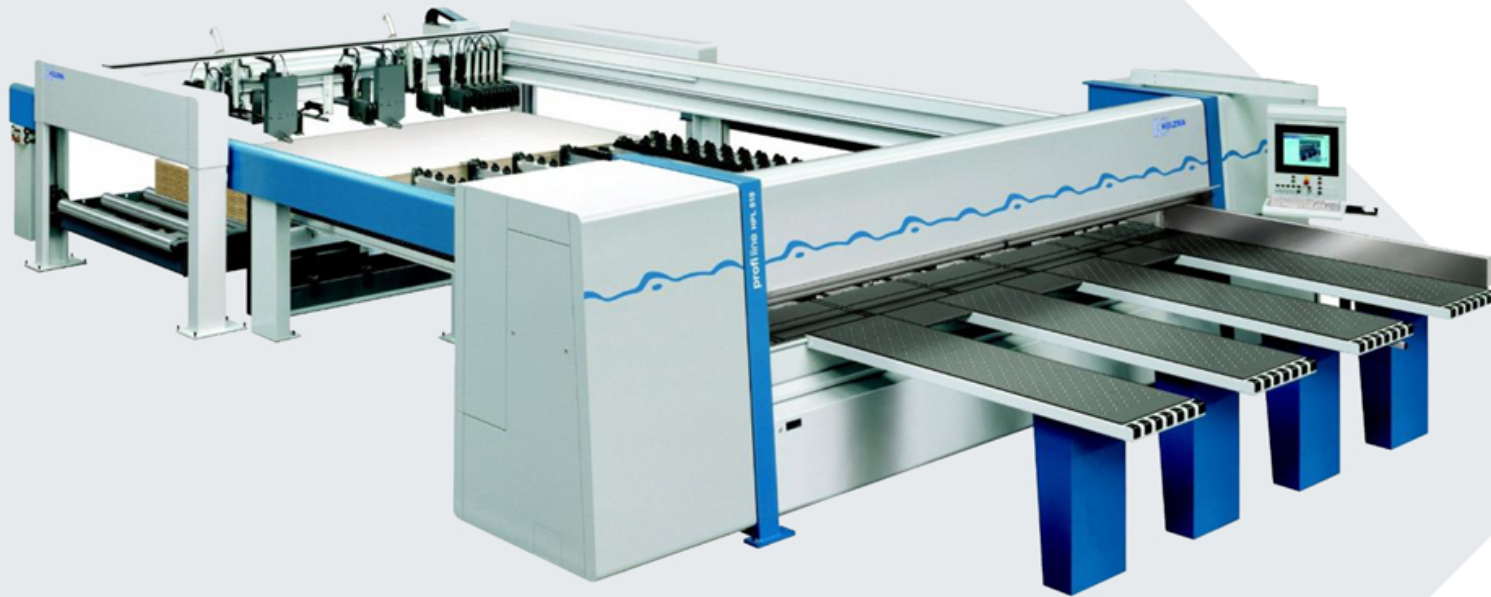

MIZRAK MZK RIPPER KK

It is a machine used for door sizing, opening the lamp and opening the lock place.
The door can be processed with a maximum size of 2200mmx1000 mm. It is PLC controlled.

PANEL SIZING MACHINE-HOLZMA HPL 11

It is an industrial type sizing machine that can cut an average of 300 sheet materials per day, offering precise sizing quality thanks to its powerful chassis, high quality components and manufacturing quality.

PROFILE WRAPPING MACHINE

It is the machine we use to wrap the door frames and moldings with various surface coating materials after profile opening.

- Types of Profiles That Can Be Coated: Wooden and MDF profiles, frames and moldings
- Types of Foils that can be used: PVC foils, high gloss foils, P.P. foils, finish foils
- Types of Glue that can be used: Polyurethane Hotmelt (PUR) glues
- Maximum Foil Width: 350 mm
- Minimum Foil Width: 20 mm
- Coating Speed: 10 - 60 meters / minute
- Total Power: 23 kW • Hotmelt System: 10 kW / hour

WEINIG POWERMAT 500 PROFILE MILLING MACHINE

It is a computer-controlled profiling machine that can process parts up to a maximum width of 230 mm and a height of 150 mm, with a processing capacity of 5-30 m per minute.
